Introduction Democracy and diversity in smart cities

"We explore the meaning of digitization and the use of data for citizens and governance in the smart city"

Prof. Liesbet van Zoonen
Scientific director
Leiden-Delft-Erasmus Centre for BOLD Cities

Experts: Overview

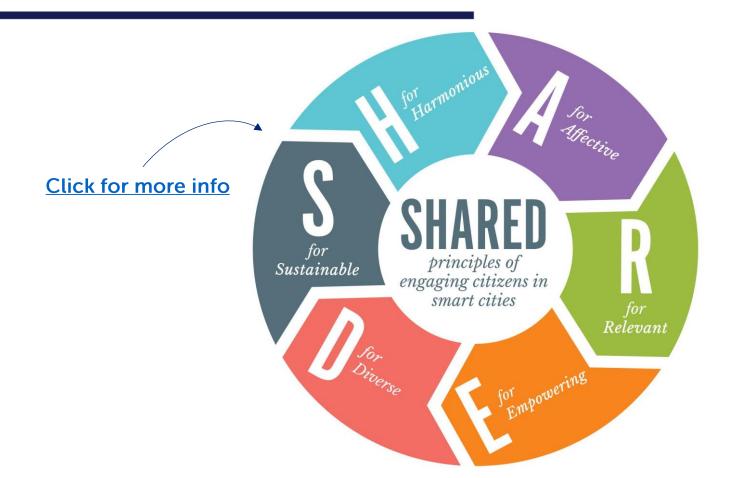

We focus on citizens and governance in the (smart) city.

We aim to aid researchers in developing and conducting their research in this area, and support researchers in seeking out collaboration and joint initiatives.

Value-driven

Mission // Making BOLD Cities SHARED

- For vulnerable citizens and situations (*Take care of*)
- With citizens and administrators (Awareness and literacy)
- By citizens and administrators (Co-creation and reinforcement of N-duple Helix)

For vulnerable citizens and situations

How can data be used in the social and physical domain:

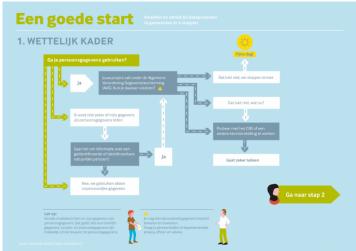

- Tailor-made approach for clients in the social domain
- Public space for the disabled
- Data- and disaster management
- "Smart" security in the public space

Advanced data science Design of public space

Immediately deployable projects

<u>Data-driven</u> <u>re-integration in</u> <u>Rotterdam</u> Quality and ethics of a data-driven approach in the social domain

Data dialogues

For vulnerable citizens and situations

How can citizens and administrators acquire more knowledge and make better decisions about data and digital technology:

- Data literacy (e.g. in libraries)
- Data empowerment
- Democratic legitimacy

Engaging research methods
Outreach programme

Immediately deployable projects

Data Walks

Your neighbourhood, your data

Design contest

By citizens and administrators

Designing, developing and using data.

- Multi-stakeholder governance
- Living labs, hackathons
 - Digital urban identities
 - urban health labs
- Co-creation and dialogue

Critical discourse analysis

Participatory action research

Advanced data analytics

Immediately deployable projects

Data Empowerment

Design Studio

Tracing and predicting gentrification

Social distancing dashboard

Partners: Quadruple helix
